Maandoverzicht neerslag en verdamping in Nederland

januari 2012

In het Maandoverzicht neerslag en verdamping in Nederland (MONV) zijn dagelijkse gegevens van neerslag, verdamping, potentieel neerslagoverschot en sneeuwdagen opgenomen. Daarnaast worden decade- en maandwaarden vermeld. De metingen worden verricht op ca. 325 KNMI-neerslagstations en 25 KNMI meteorologische stations, alwaar uit metingen van temperatuur en straling de referentie-gewasverdamping wordt berekend. Het MONV is ruim 75 jaar uitgegeven als KNMI-periodiek en wordt sinds 2009 verspreid via internet (<http://www.knmi.nl/nederland-nu/klimatologie/gegevens/monv>).
