# Maandoverzicht neerslag en verdamping in Nederland

november 2023

**Landelijk gemiddelde dagelijkse neerslagsom november 2023 (gebaseerd op 319 stations)**

**Maandsom: 171 mm Normaal: 80 mm**

In het Maandoverzicht neerslag en verdamping in Nederland (MONV) zijn dagelijkse gegevens van neerslag, verdamping, potentieel neerslagoverschot en sneeuwdagen opgenomen. Daarnaast worden decade- en maandwaarden vermeld. De metingen worden verricht op ca. 325 KNMI-neerslagstations en 25 KNMI meteorologische stations, alwaar uit metingen van temperatuur en straling de referentie-gewasverdamping wordt berekend. Het MONV is ruim 75 jaar uitgegeven als KNMI-periodiek en wordt sinds 2009 verspreid via internet (<http://www.knmi.nl/nederland-nu/klimatologie/gegevens/monv>).
